**Abstract**

Big Data bring new opportunities to modern society and challenges to data scientists. On the one hand, Big Data hold great promises for discovering subtle population patterns and heterogeneities that are not possible with small-scale data. On the other hand, the massive sample size and high dimensionality of Big Data introduce unique computational and statistical challenges, including scalability and storage bottleneck, noise accumulation, spurious correlation, incidental endogeneity and measurement errors. These challenges are distinguished and require new computational and statistical paradigm. This paper gives overviews on the salient features of Big Data and how these features impact on paradigm change on statistical and computational methods as well as computing architectures. We also provide various new perspectives on the Big Data analysis and computation. In particular, we emphasize on the viability of the sparsest solution in high-confidence set and point out that exogenous assumptions in most statistical methods for Big Data cannot be validated due to incidental endogeneity. They can lead to wrong statistical inferences and consequently wrong scientific conclusions.

# 快速检索与高级检索页面

The screenshot displays the Oxford Journals website interface. At the top, the Oxford Academic logo and 'Journals' title are visible. A navigation bar includes links for 'Journals A to Z', 'Journals by Subject', 'Customer Services', and 'Resources'. A search bar on the right contains 'All Journals' and an 'Advanced Search' button.

The main content area features an 'Advanced search' section on the left, highlighted with a yellow box. It includes a search input field, a 'Filter' dropdown, and 'Add term' and 'Update' buttons. A yellow callout box with the text '高级检索' (Advanced Search) points to this section. Below the search section are filters for 'Journal citation' (with dropdowns for 'Select journal', 'Year', 'Volume', 'Issue', and 'Page') and 'Format' (with radio buttons for 'Journal (474)' and 'Journal Article (661000)').

The search results are displayed in a list format, showing '1-20 of 5678201' items. The first result is 'Journal of the London Mathematical Society', described as an official journal of the London Mathematical Society. The second result is 'Transactions of the Linnean Society of London. 2nd Series. Botany', described as an official journal of The Linnean Society of London. The third result is 'Multimedia Manual of Cardio-Thoracic Surgery', described as an official journal of the European Association for Cardio-Thoracic Surgery. Each result includes a 'Journal' label and a small thumbnail image. A 'Save search' link is located above the results. A 'Sort by' dropdown menu is set to 'Relevance', and pagination controls show '1 2 3 4 5 Next'. A '截屏' (Screenshot) button is located at the bottom right of the results area.
