## Ernest (Miller) Hemingway

**Author:** Scott Donaldson  
**Date:** 1998

**From:** American Writers, Retrospective Supplement  
**Publisher:** Charles Scribner's Sons

**Document Type:** Biography; Critical essay  
**Length:** 15,213 words

### ABOUT THIS PERSON

**Born:** July 21, 1899 in Oak Park, Illinois, United States  
**Died:** July 02, 1961 in Ketchum, Idaho, United States  
**Nationality:** American  
**Occupation:** Writer  
**Other Names:** Hemingway, Ernest Miller

ERNEST Hemingway ranks as the most famous of twentieth-century American writers. Like Mark Twain, Hemingway is one of those rare authors most people know about whether they read him or not. The difference is that Twain, with his white suit, ubiquitous cigar, and genial personality, survives in the public imagination as a basically lovable figure, while the image of Hemingway as rugged and macho has been much less universal. In fact, Hemingway's fame, Hemingway has been regarded less as a writer dedicated to his craft and more as an action hero who happened to be afflicted with genius. When he won the Nobel Prize, the magazine reported the news under *Heroes* rather than *Books* and went on to describe him as "a globetrotting expert on bullfights, booze, women, wars, big game, sea fishing, and courage." Hemingway did in fact address all those subjects in his writing. He acquired his expertise through well-reported acts of participation as well as through going to all the wars of his time, hunting and fishing for great beasts, and occasionally getting into fistfights, drinking too much, and becoming, in the process, a celebrity recognizable for his signature beard and challenging physical appearance.

### PAPA HEMINGWAY

To a considerable degree, Hemingway was complicit in the formation of the myth of himself as a young man living in Chicago and bored by pretentious drawing room conversation. As an artist, he rejected out of hand the role of the epicene indoor aesthete. As a writer, it was going to be at the opposite pole from *Proust* and his corks. Hemingway had grown up in close touch with the outdoors, and through the sports afield and astream that he had learned from his father. In doing so, he undoubtedly took some pleasure in confounding public expectations and

**Floods**

Venice, Italy, is experiencing its worst flooding in decades and has prompted city officials to declare a state of emergency. The high tide in Venice (which usually takes place in the winter) has peaked approximately 20 inches higher than what was expected for the season. Approximately 45 percent of the city is flooded. The floodwaters have caused massive damage to the city's cultural legacy and to residences and businesses.

### ISSUES OF INTEREST

#### Carbon Footprint

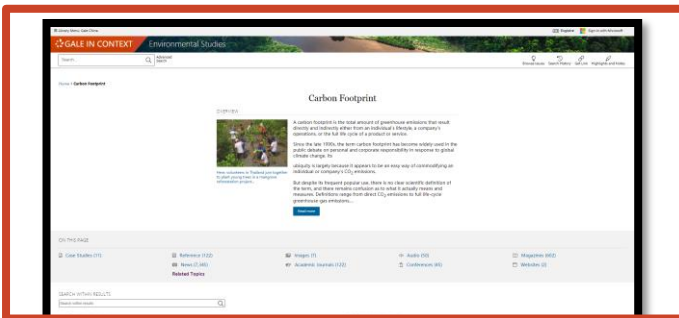

Reducing our carbon footprint is essential to the fight against global warming. A carbon footprint is the total amount of greenhouse emissions from an individual's lifestyle, a company's operations, or the full life cycle of a product or service. Planting trees, to reduce carbon footprint, is a great way to help!

## Carbon Footprint

A carbon footprint is the total amount of greenhouse emissions that result directly or indirectly either from an individual's lifestyle, a company's operations, or the full life cycle of a product or service.

Since the late 1990s, the term carbon footprint has become widely used in the public debate on personal and corporate responsibility in response to global climate change. Its ubiquity is largely because it appears to be an easy way of commodifying an individual or company's CO<sub>2</sub> emissions.

But despite its frequent popular use, there is no clear scientific definition of the term, and there remains confusion as to what it actually means and measures. Definitions range from direct CO<sub>2</sub> emissions to full life-cycle greenhouse-gas emissions...

### WORDS TO KNOW

**CARBON CALCULATOR:** Software device, often accessed through a Web site, that allows an individual or business to calculate their carbon footprint, that is, how much greenhouse warming is generated to support the present mode of existence of that individual or business.

**CARBON OFFSETS:** Reductions in emissions of CO<sub>2</sub> (or other greenhouse gases) or enhanced removals of such gases from the atmosphere that are arranged by polluters in order to compensate for their releases of greenhouse gases. Carbon offsets may be purchased by individuals or groups.

**CARBON SINKS:** Carbon reservoirs such as forests or oceans that take in and store more carbon (carbon sequestration) than they release. Carbon sinks can serve to partially offset greenhouse-gas emissions.

**COMMODIFY:** To make something into a commodity, that is, something which is bought and sold. Some have argued that carbon markets are unethical because they commodify the well-being of Earth itself, on which all life depends.

**ECO-LEXICON:** The group or class of words (lexicon) devised for, or especially connected with, speech about environmental concerns. Often has a derisive nuance, as in "Why have 'Civic' or 'Insight' not entered the eco-lexicon in the way that 'Prius' has?"

**FOSSIL FUELS:** Fuels formed by biological processes and transformed into solid or fluid minerals over geological time. Fossil fuels include coal, petroleum, and natural gas. Fossil fuels are non-renewable on the timescale of human civilization, because their natural replenishment would take many millions of years.

**GREENHOUSE GASES:** Gases that cause Earth to retain more thermal energy by absorbing infrared light emitted by Earth's surface. The most important greenhouse gases are water vapor, carbon dioxide, methane, nitrous oxide, and various artificial chemicals such as chlorofluorocarbons. All but the latter are naturally occurring, but human activity over the last several centuries has significantly increased the amounts of carbon dioxide, methane, and nitrous oxide in Earth's atmosphere, causing global warming and global climate change.

#### 碳足迹

**碳足迹**

碳足迹是指由于个人的生活方式，公司的运营或产品或服务的整个生命周期而直接或间接产生的温室气体排放总量。

自1990年代后期以来，碳足迹一词已广泛用于有关应对全球气候变化的个人和企业责任的公开辩论中。它的普遍存在很大程度上是因为它似乎是使个人或公司的二氧化碳（CO<sub>2</sub>）排放商品化的简便方法。

尽管经常使用该术语，但该术语尚无明确的科学定义，并且仍存在混淆 关于其实际含义和措施。定义范围从直接二氧化碳排放到整个生命周期的温室气体排放。

英国国会科学技术办公室将碳足迹定义为：一个产品或服务的整个生命周期中排放的其他温室气体。它表示为每千瓦时二氧化碳当量的克数（gCO<sub>2</sub>-eq/kWh），这解释了其他温室气体对全球变暖的不同影响。”由于促成二氧化碳排放的过程以复杂的方式相互影响，因此英国科学家Laurence Wright, Simon Kemp和Ian Williams建议对碳足迹进行更具包容性的定义，同时考虑到特定人口的二氧化碳和甲烷排放，系统或活动。

尽管定义不同，但碳足迹旨在衡量人和产品对地球的影响。碳足迹概念的部分吸引力在于，它为个人或组织对温室气体排放的贡献和责任做出了明确的标记。该术语之所以如此迅速地进入生态词典的另一个原因是，它为有责任心的人和公司提供了一个可以抵消的数字。一旦实体意识到其碳足迹，便可以采取措施减少其碳足迹。

The United Kingdom Parliamentary Office for Science and Technology defines the carbon footprint as "the amount of CO<sub>2</sub> and other greenhouse gases, emitted over the carbon dioxide equivalent per kilowatt-hour of generated electricity, plus the amount of CO<sub>2</sub> and other greenhouse gases, emitted over the life cycle of the product or service, plus the amount of CO<sub>2</sub> and other greenhouse gases, emitted over the life cycle of the product or service, plus the amount of CO<sub>2</sub> and other greenhouse gases, emitted over the life cycle of the product or service." As the processes contributing to carbon dioxide emissions interact with each other in complex ways, British scientists Laurence Wright, Simon Kemp, and Ian Williams suggest a more inclusive definition of carbon footprint, taking into account both carbon dioxide and methane emissions of a given population, system, or activity.

Despite the differing definitions, a carbon footprint is intended to measure the impact of people and products on the planet. Part of the attraction of the concept of a carbon footprint is that it gives a clear marker as to an individual or

自20世纪90年代末以来，碳足迹一词已广泛应用于有关应对全球气候变化的个人和企业责任的公开讨论中。

它的普遍接受很大程度上是因为它是一个简单的商品化方式去描述个人或公司的二氧化碳（CO<sub>2</sub>）排放。

The screenshot shows the EPA's Carbon Footprint Calculator interface. At the top, there's a navigation bar with 'Learn the Issues', 'Science & Technology', 'Laws & Regulations', and 'About EPA'. Below this is a search bar and a 'Carbon Footprint Calculator' heading. The main content area features a large graphic with the text 'What is your carbon footprint?' and 'Take a few minutes to find out with EPA's Household Carbon Footprint Calculator.' Below the graphic are input fields for 'Number of people in your household' and 'ZIP Code', and a 'Get Started' button. To the right of the input fields is a diagram of a house with labels for 'Home Energy', 'Waste', and 'Transportation'. Below the main content, there are three columns: 'About', 'How To', and 'Download', each containing bullet points and links. The 'About' section explains that the calculator estimates carbon footprint from home energy, transportation, and waste. The 'How To' section provides instructions on how to use the calculator, including downloading it as a spreadsheet. The 'Download' section offers a link to the calculator in Excel format.

When the Germans failed to destroy the British Royal Air Force, they began a campaign bombing the city of London during World War II. Their efforts became known as the London Blitz.
- PRIMARY SOURCE**  
Suddenly we were gaping upwards. The brilliant sky was crisscrossed from horizon to horizon by innumerable vapour trails. The sight was a completely novel one. We watched, fascinated, and all work stopped. The little silver stars sparkling at the heads of the vapour trails turned east. This display looked so insubstantial and harmless; even beautiful. Then, with a dull roar which made the ground across London shake as one stood upon it, the first sticks of bombs hit the docks. Leisurely, enormous mushrooms of black and brown smoke shot with crimson climbed into the sunlit sky. There they hung and slowly expanded, for there was no wind, and the great fires below fed more smoke into them as the hours passed.

## THE ALLIED ADVANCE

The Allies began pushing forward in the next few years. In several key battles, they took back territories that the Axis had previously conquered. To further weaken U.S. involvement in the Pacific, Japan engaged the U.S. Navy in the Battle of Midway, only to suffer heavy losses.

Only a few months later, another major battle happened, as German and Soviet forces clashed over the city of Stalingrad in the Soviet Union. The Battle of Stalingrad was the largest and bloodiest battle fought in World War II, but it ended in a victory for the Allies. Other major battles included the 1943 invasion of Italy, in which Italy surrendered to the Allies, and the 1944 invasion of France, in which the Allies drove away the occupying Germans. Operation Neptune, or D-Day, was another major operation, in which the Allies freed Western Europe from German control. It was also the largest seaborne invasion in history. By 1944, the Allies began freeing the Nazi concentration camps, where many Jews were imprisoned and killed.

With Italy defeated and the Allies closing in on Germany, Hitler moved to an underground bunker in Berlin. He committed suicide in this same bunk on April 30, 1945. Europe was finally freed from Axis control on May 8, 1945 after Allied troops captured Berlin and obtained Germany's unconditional surrender.

Japan refused to surrender despite the events in Europe. The Allies threatened it with "prompt and utter destruction," but they knew this would not happen if they directly attacked the Japanese mainland. Hoping to quickly end the war, the United States used its most destructive weapon, the atomic bomb, on two Japanese cities. Hiroshima was bombed on August 6, and Nagasaki on August 9. The bombings instantly killed over a hundred thousand people. Many more died later due to the aftereffects of nuclear radiation. Seeing the destructive power of the Allies, Japan formally surrendered on August 15, 1945, ending the war for good.

### CRITICAL THINKING QUESTIONS

War is often costly in terms of people and resources, so why did each nation participate in World War II despite the risks?

How might the war have ended if the atomic bomb had not been used as a "shortcut"?

What are some of the consequences of remaining neutral in a conflict as widespread as World War II?

What contributed to Germany playing a key role in escalating World War II?
